

MUSIC LIFE STUDIOS

CONTRACT GENERATOR ASSEMBLY MAP

1. Core Rule

Do not make customers sign the entire contract library.

The generator should assemble **one transaction-specific agreement** containing only the documents and modules relevant to that transaction.

The two internal policy documents used to design this system are **not customer-signature documents**.

They are business-rule source documents.

2. ALWAYS-INCLUDED COMPONENTS

Every paid Studio transaction should ordinarily include:

Component	Trigger
Music Life Studios Services Agreement	Every applicable transaction
Schedule A — Order, Price, Benefits, License and Deliverables Summary	Every transaction
Electronic Records and Signature Consent	Every electronically signed transaction
Relevant Booking / Refund Policy	Where booking/payment rules apply

3. ACCOUNT / PROGRAM MODULES

Customer Status	Module
Guest / nonmember	No loyalty membership module
Free Music Lifer	Music Lifer Loyalty Schedule
Passport Starter	Passport Membership + Loyalty Schedule

Customer Status	Module
Passport Builder	Passport Membership + Loyalty Schedule
Passport Release	Passport Membership + Loyalty Schedule

Account status must be saved with the transaction.

4. SERVICE MODULE TRIGGERS

Service Selected	Add Module
Hourly Recording	Recording Session
Release-Ready Song	Release-Ready Song
Quick Finish	Quick Finish
Standard Mix	Standard Mix and Master
Advanced Mix	Advanced Mix and Master
Mastering only	Master Only
Custom Beat	Custom Beat Production
Build-a-Song	Build-a-Song
Complete Custom Single	Complete Custom Single
Signature Custom Single	Signature Custom Single
YouTube/podcast/film/game composition	Media Composition and License

Only selected service modules should appear.

5. BEAT-LICENSE TRIGGERS

A. Music Lifer Reward

When a Free Music Lifer reaches 5 eligible completed paid sessions:

Reward record:

- 2 recording hours; and
- 1 Starter Reward Beat License.

The reward record itself is not yet a beat license.

The Customer has 90 days to redeem the beat reward.

When the Customer selects a beat and completes acceptance, generate:

1. Master Agreement, if needed for the transaction;
2. Schedule A;
3. Music Lifer Loyalty Schedule;
4. Starter Reward Beat License.

B. Passport Starter Reward

After 3 verified successful paid months:

- 2 recording hours; and
- 1 Starter Reward Beat License.

Upon beat redemption, generate the Starter Reward Beat License.

C. Passport Builder Reward

After 2 verified successful paid months:

- 3 recording hours;
- 1 Commercial Beat Lease; and
- 25% off one eligible Quick Finish.

Upon beat redemption, generate the Commercial Beat Lease.

D. Passport Release Reward

After 2 verified successful paid months:

- 3 recording hours;
- 2 Commercial Beat Leases; and
- 50% off one eligible Quick Finish or Master Only service.

Each redeemed beat should create its own license record.

6. BEAT AVAILABILITY STATES

The database should support at least:

AVAILABLE_NONEXCLUSIVE

Beat may be licensed nonexclusively.

PENDING_EXCLUSIVE

No new licenses or reward redemptions should be issued while the exclusive transaction is pending.

EXCLUSIVE_SOLD

No new licenses unless the exclusive agreement expressly permits them.

WITHDRAWN

Not currently available for licensing.

Historical licenses must remain visible to admin regardless of current availability.

7. REWARD RECORDS VS. LICENSE RECORDS

Do not use the same database object for both.

Reward Record

Should contain:

- Customer ID;
- program/tier;
- qualifying event;
- reward-earned date;
- redemption deadline;
- reward type;
- redemption status; and
- auditable adjustments.

Beat License Record

Should contain:

- Customer ID;
- artist name;
- beat ID;
- license type;
- reward source;
- license version;
- license start date;

- usage limits;
- monetization rights;
- DSP rights;
- Content ID treatment;
- signatures;
- timestamp;
- immutable PDF/signed snapshot; and
- current administrative status.

A reward exists before a beat is chosen.

A license exists only after redemption and acceptance.

8. VERSIONING RULE

Never recreate an old signed license from the newest template.

For every signed transaction, store:

- Master Agreement version;
- Schedule A version;
- service-module version;
- Passport/Music Lifer version;
- beat-license version;
- Add-On versions;
- signature data;
- exact PDF or immutable rendered copy; and
- payment status.

If terms change later, old agreements stay tied to the old versions.

9. EXCLUSIVE-SALE SAFETY CHECK

Before admin can complete an exclusive beat sale, the system should show:

- beat ID;
- all historical nonexclusive licenses;
- active licenses;
- reward licenses;
- commercial leases;
- license dates;
- applicable survival rights; and
- any known restrictions.

Admin should have to acknowledge prior licenses before finalizing the exclusive sale.

The Exclusive Beat License Rider should then disclose whether prior valid licenses exist.

10. CONTENT ID CONTROL

For nonexclusive licenses:

Default:

Content ID registration prohibited unless specifically authorized.

The license record should store:

- Content ID permitted: Yes / No;
- allowlisting required: Yes / No;
- distributor restrictions;
- authorized claimant, if any; and
- dispute procedure.

Do not allow frontend customer input alone to change Content ID rights.

11. MEMBERSHIP BILLING STATES

Recommended internal states:

ACTIVE

Payment verified; benefits available.

PAST_DUE

Payment failed; no new benefits issued.

PAUSED

One-cycle approved pause; no charge/new benefits; rollover and reward progress frozen.

CANCELED_PENDING_END

Cancellation requested; membership active through paid-through date.

ENDED

Paid period has ended.

Membership ending must not automatically delete:

- project files still within retention;
- historical transactions;
- reward history; or
- issued beat licenses.

12. FILE-RETENTION LOGIC

Guest / Nonmember

Retention period: **30 days**

Free Music Lifer

Retention period: **90 days**

Passport

Retention period: **at least 90 days at launch**

The system still needs one consistent approved trigger:

☐ Session completion

☐ Final delivery

☐ Project closure

☐ Service-specific trigger

This must be finalized before automated deletion is enabled.

Do not calculate retention only from membership cancellation.

13. BOOKING LOGIC

Standard deposit:

50%

Ordinary cancellation/rescheduling notice:

At least 24 hours

The booking engine should preserve:

- booking time;
 - session time;
 - payment status;
 - deposit amount;
 - cancellation timestamp;
 - rescheduling timestamp;
 - account status;
 - reserved Passport hours;
 - loyalty hours used; and
 - final booking disposition.
-

14. QUICK FINISH UPGRADE LOGIC

When an included Passport Quick Finish is upgraded:

1. determine Standard or Advanced retail price;
2. subtract the configured retail value of the included Quick Finish;
3. calculate remaining amount;
4. apply eligible Passport discount to remaining eligible amount;
5. show the calculation before approval;
6. do not perform paid upgrade work until Customer accepts.

Example:

Standard Mix: \$125

Quick Finish credit: \$75

Remaining: \$50

Member discount: applied to \$50

15. HIGH-RISK MANUAL-REVIEW MODULES

The generator should not automatically finalize these without admin approval:

- Media Composition and License;
- Exclusive Beat License;
- Copyright Assignment / Full-Rights Buyout;
- Work-Made-for-Hire language;
- unusual publishing changes;
- unusual producer royalty changes;
- custom synchronization rights;
- manual overrides affecting ownership.

These transactions should require separate assent.

16. REQUIRED ADMIN CONTROLS

Admin should be able to:

- change catalog availability;
- review prior licenses;
- approve custom quotes;
- approve exclusive sales;
- approve buyouts;
- issue auditable loyalty adjustments;
- pause memberships;
- review payment reversals;
- manage Content ID permissions;
- record file-retention dates; and
- retrieve exact historical agreements.

Admin should not be able to silently alter an already signed historical license.

Corrections should create a new documented amendment or administrative note.

17. EXAMPLE ASSEMBLIES

Example A — Guest Recording Customer

Generate:

1. Master Agreement

2. Schedule A
3. Recording Session Module
4. Booking Policy
5. Refund Policy
6. Electronic Signature Consent

Do not include Passport or beat terms.

Example B — Passport Builder Using Monthly Recording Hours

Generate:

1. Master Agreement
2. Schedule A
3. Passport Membership/Loyalty Schedule
4. Recording Session Module
5. Booking Policy
6. Electronic Signature Consent

Schedule A should show:

- Passport Builder;
- hours redeemed;
- normal retail value;
- membership credit;
- additional amount due, if any.

Example C — Passport Starter Redeems Beat Reward

Generate:

1. Master Agreement
2. Schedule A
3. Passport Membership/Loyalty Schedule
4. Starter Reward Beat License
5. Electronic Signature Consent

Do not add a Commercial Beat Lease unless the Customer upgrades.

Example D — Passport Builder Redeems Commercial Beat

Generate:

1. Master Agreement
2. Schedule A
3. Passport Membership/Loyalty Schedule
4. Commercial Beat Lease

5. Electronic Signature Consent

Example E — Direct Exclusive Beat Purchase

Generate:

1. Master Agreement
2. Schedule A
3. applicable production module, if any
4. Exclusive License Module
5. Exclusive Beat License Rider
6. Electronic Signature Consent
7. separate exclusive-rights assent

Admin must review prior licenses before finalization.

Example F — Full Copyright Buyout

Generate:

1. Master Agreement
2. Schedule A
3. applicable service/production module
4. Full-Rights Buyout / Copyright Assignment
5. separate assent
6. Electronic Signature Consent

Manual approval required.

18. INTERNAL DOCUMENTS NOT SHOWN TO CUSTOMERS

Keep the following as internal governance documents:

- Entertainment Lawyer Drafting Prompt
- Resolved Policies & Beat-Lease Framework
- Reward Beat License Addendum
- attorney review notes;
- contract version register;
- clause review matrix; and
- implementation decision log.

These tell the generator and reviewing lawyer what the business rules are.

They are not ordinarily customer contracts.
